Docker and Kubernetes: The Practical Guide [2023 Edition]

Phablo Tavares Paixão

AI | NLP | n8n | LangChain | Automation
Aparecida de Goiânia, Goiás, Brazil

Summary

I'm an AI Analyst at Rennova, where I apply Artificial Intelligence (LLMs, RAG, Prompt Engineering) to create innovative solutions. Daily, I work with n8n, Langchain, Python, Django, and Selenium to develop and optimize automations. My background also includes innovation projects at the Center of Excellence in Artificial Intelligence at UFG, focusing on facial recognition and gait recognition, and backend system development with Django, Docker, and Kubernetes at CETT/UFG. Previously, I worked as a Flutter Developer at Personal Fit, contributing to the creation and evolution of mobile applications. I have experience in Flutter, Firebase, software architecture, Design Patterns, and development best practices. My expertise includes:- Automation and AI: n8n, LLM, RAG, Prompt Engineering.- Infrastructure: RESTful APIs, GraphQL, and SQL/NoSQL databases- Languages and Frameworks: Python, Django, Flutter, Typescript- Tools and Platforms: Firebase (Firestore, Functions, Auth), Git, Docker, Kubernetes, Selenium I'm currently a seventh-period Software Engineering student at UFG, always seeking to evolve professionally and create products that make a difference.

Experience

Rennova

Artificial Intelligence Analyst

August 2025 - Present (11 months)

Goiânia, Goiás, Brazil

- Develop and manage end-to-end projects using AI and LLMs.
- Identify opportunities to apply AI and automation in business processes.
- Prototype and test intelligent solutions to ensure the delivery of relevant results.

Personal Fit

Mobile Flutter Developer

September 2024 - June 2025 (10 months)

Brazil

Development and maintenance of software for Android, iOS, and Web using technologies such as Flutter, TypeScript, Git, and Google Firebase services.

- Maintenance of existing software problems, fixing bugs reported by users.
- Implementation of new features following the established software architecture and predefined UI designs, and validation with other developers, product managers, and other stakeholders to enhance the functionality.

Centro de Excelência em Inteligência Artificial (CEIA)

Scholarship holder in the K Program “Programa k”

October 2023 - September 2024 (1 year)

Goiânia, Goiás, Brazil

Development of hard and soft skills through practical activities created by students and evaluated by skilled tutors who assist us in planning solutions.

Projects I participated in:

- My Excellence Class “Minha Aula de Excelência”: Creation of tools to improve the quality of education in universities.
- Smart Attendance “Inteligente Presente”: Tool for automatic attendance logging using facial recognition and gait recognition.

Universidade Federal de Goiás

Backend Software Development Intern - CETT/UFG

July 2023 - April 2024 (10 months)

Goiânia, Goiás, Brazil

Software development and maintenance using technologies such as: Python, Django Rest Framework, Docker, Kubernetes, Git, JavaScript, HTML, and Bootstrap.

Education

Universidade Federal de Goiás

Bachelor's degree, Computer Software Engineering · (January 2023 - July 2026)
